

The word "formulate" typically means to create or develop a plan, idea, theory, or solution to a problem by putting together different elements or components in a logical and organized manner. It often involves combining different pieces of information, analyzing them, and using them to develop a clear and coherent plan or approach.

PROFILE

FCG

FCG is a planning and design firm that takes a thoughtful approach to design, grounded in a thorough understanding of how spaces can influence behavior.

The team is committed to crafting environments that not only fulfill the needs of their clients, but also foster productivity, collaboration, and well-being.

FCG collaborates with top research institutions and science-based companies to create cutting-edge facilities, with a strong emphasis on precision and attention to detail.

Additionally, FCG expands their expertise beyond science and technology buildings to include corporate building design and corporate interiors.
